

A CONVERSATION WITH THE YOUTH

Do you watch TV?

How many of you have computers/lap tops etc.?

Do you see or read or hear about killings, wars, terrorism, terrorists, etc.?

How many of you use internet, emails, and social media and post messages?

Everything is noted, monitored & followed through by someone.

Psychological profiles are created and all information is collected and evaluated.

Everything on the TV & Internet has incomplete dissemination of information.

It can be partly false or completely false or a propaganda. But it is definitely biased, based upon the source, the writer or the place of origin of that information. Truth is either hidden or sacrificed at times. Sometimes some information is to influence the general public, and is called 'psychops' (psychological operations). This is done by individuals, organizations, special interest groups or by some governments too.

You must not make any judgments and avoid being influenced by ANYTHING you see or hear on TV, Internet, any social medium postings like, face book, my space, chat lines, instagrams etc. You must be very careful ALL the time. Do not give any of your opinions, information or post anything.

If you get upset watching, reading or hearing anything, then talk to your parents, or contact an elder immediately. If you think you can do something to change what someone else is saying/posting, by you giving some kind of a response, then DON'T.

If you DO, then based upon your profile and ALL your postings, you are going to be entrapped and the hammer of the law will befall on you very very hard.

You can only make a change by getting your education first, and knowing/researching all sides of an issue, and by consulting those who are experts in the field, and follow the lawful processes and procedures.

Pray regularly, seek Allah's mercy and His help and His guidance for Peace and Love for ALL mankind. Insha'allah you will be guided by Him on the path of righteousness.

(Give examples of peace and Islam in Buddhist Afghanistan- Islam's condemnation and forbiddance of killing ANY human being, Muslim or a Non Muslim-especially women, children, elderly, animals etc.)
